Quarterly Operations Report
2nd Quarter 2023

Introduction

This report is prepared for the Rhode Island General Assembly in conformance with the Permanent Noise Monitoring Act of 1998, as amended. It contains statistical information on aircraft operations, activity levels by aircraft types, and noise complaints for the Second Quarter, 2023. The Second Quarter is defined as operations from April through June of 2023.

Rhode Island T. F. Green International Airport is a small-hub commercial service airport located in Warwick, RI. It serves the Rhode Island, Southern Massachusetts and Eastern Connecticut communities.

The airport has two active runways, 5-23 and 16-34. Runway 5-23 is 8,700 feet long and 150 feet wide. It is oriented in a north/south direction and serves as the primary runway for most operations. Runway 16-34 is the “crosswind” runway oriented in a northwest/southeast direction. It is 6,081 feet long and 150 feet wide and used as weather conditions dictate.

Rhode Island T. F. Green International Airport was among the first airports in the country to participate in the Federal Aviation Administration’s Noise and Land Use Compatibility Program, commonly referred to as Part 150. Under the direction of the State of Rhode Island and now the RIAC, Rhode Island T. F. Green International Airport has had an active noise mitigation program since the early 1980s.

In 1998, RIAC undertook a complete update of the original Part 150 Study and recommended several new operations procedures designed to minimize noise impacts on surrounding communities. The center of these recommendations involved the implementation of noise abatement departure and arrival procedures for turbojet aircraft.

In June 2000, the FAA approved these new procedures and the local air traffic control tower implement the assigned departure headings in an effort to reduce the number of persons adversely affected by aircraft operations.

Permanent Noise Monitoring Act

In 1998, the Rhode Island Legislature enacted Title 1, Aeronautics, Chapter 1-5; Permanent Noise Monitoring Act – Aircraft Operations Monitoring System (AOMS). This Act required the RIAC to install an aircraft operations monitoring system, and collect and report a summary of the collected data on a quarterly basis. This document is generated to meet those requirements.

The AOMS previously relied on five (5) radar sensors deployed throughout the State of Rhode Island. The sensors were subject to repeated failures resulting in loss of data when one or more sensors were not fully operational. The sensors and data acquisition system have exceeded their expected service life. RIAC has updated the system by integrating multiple existing aircraft surveillance systems merged into a single data stream to improve reliability and accuracy of data. The data is archived for use in generating reports. Information collected includes; aircraft type, flight number, registration number, altitude, arrival/departure status and the origin or destination.

Quarterly Operations Report
2nd Quarter 2023

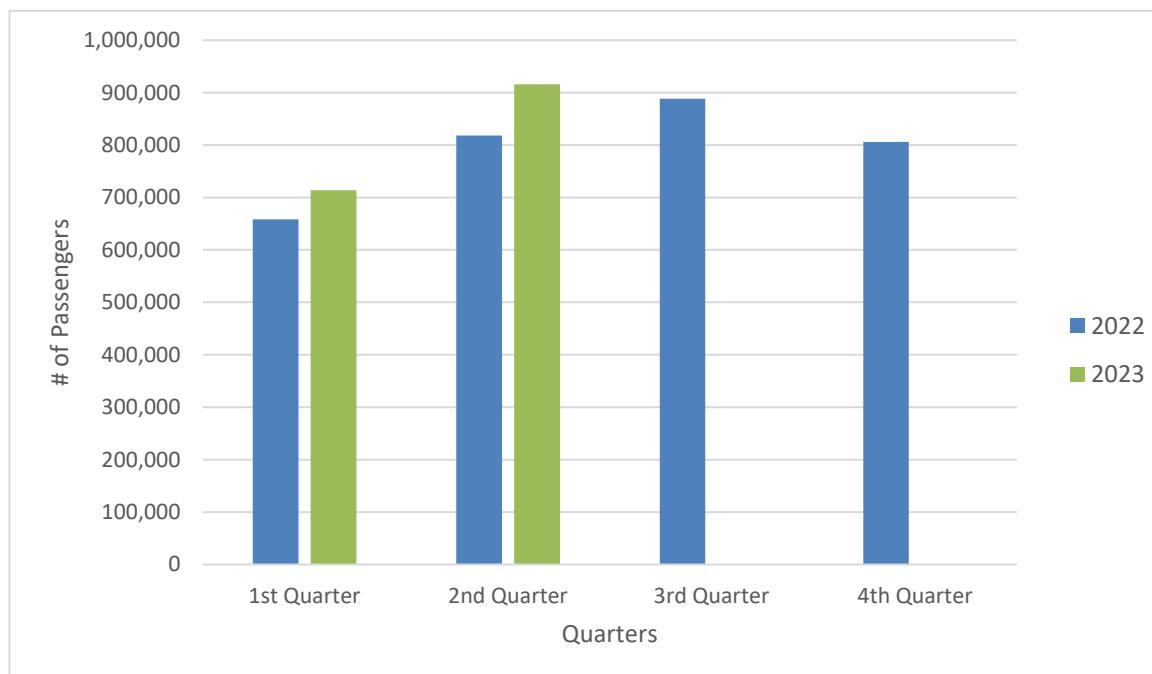

Passenger Activity

Airports use 2 criteria to measure activity; the number of operations and the number of passengers. This section discusses the passenger activity levels associated with aircraft operations at Rhode Island T. F Green International Airport in the Second Quarter of 2023.

Rhode Island T. F. Green International Airport served approximately 915,878 passengers during the Second Quarter of 2023. Figure 1 shows the number of passengers that have used the airport via scheduled air carriers, commuter and charter flights since 2022.

In 2020 through 2021 there was a downturn in passenger activity due to the travel impacts of the COVID-19 pandemic. Air travel has started to rebound, resulting in an uptick in passenger levels.

Figure 1: Total Passengers, by Quarter

Quarterly Operations Report 2nd Quarter 2023

Aircraft Operations

Aircraft operations can be classified in a number of ways including by type of aircraft, arrivals/departures, origin/destination, airline fleet, Part 36 (relative noisiness) and time of day.

To present the overall perspective of operations, Table 1, highlights the arrivals and departures of all aircraft by runway at Rhode Island T. F. Green International Airport.

In general aircraft must take off into the wind, therefore, aircraft also arrive into the wind to remain consistent with the traffic flow and avoid aircraft departing and arriving in the same direction.

As previously stated, there are 2 runways at Rhode Island T. F. Green International Airport, 5-23 and 16-34. Runways are given numbers based on the compass heading for each runway end. By designating each runway end, the Air Traffic Control Tower and pilots know which direction to land or depart. For example, Runway 5 has a compass heading of 050 degrees and is oriented to the north. Aircraft operating on this runway will depart to the north and arrive from the south. Conversely, Runway 23 has a heading of 230 degrees and is oriented to the south. Aircraft operating on Runway 23 will depart to the south and arrive from the north.

Total Operations

The Aircraft Operations Monitoring System (AOMS) collected 9,087 flight tracks for aircraft operations during this period. There were 4,501 departures and 4,586 arrivals for an average of 100 operations per day. Table 1 depicts aircraft operations by runway and operation type.¹

Table 1: Total AOMS Operations by Runway, 2nd Quarter 2023²

Runway	Arrivals		Departures		Total	
	# of Ops	%	# of Ops	%	# of Ops	%
5	1,512	33%	1,474	33%	2,986	35%
16	59	1%	60	1%	119	1%
23	2,700	59%	2,786	62%	5,486	50%
34	315	7%	181	4%	496	14%
Total	4,586	100%	4,501	100%	9,087	100%

Source: RIAC 2023 Aircraft Operations Monitoring System

¹ Detailed record of operations by aircraft type and time of day can be found on Rhode Island T.F. Green International Airport's website, www.flyri.com, listed under Quarterly Aircraft Operations Report, Runway Operations Data 2nd Quarter 2023.

² The aggregate number of aircraft operations reported by the FAA for the 2nd Quarter 2023 was 17,124.

Figure 2 depicts the runway use graphically over an aerial view of the airport.

Figure 2: Aerial View of Total Operations, by Runway End, 2nd Quarter, 2023

Source: RIAC, Airline Activity Reports and Aircraft Operations Monitoring System 2023

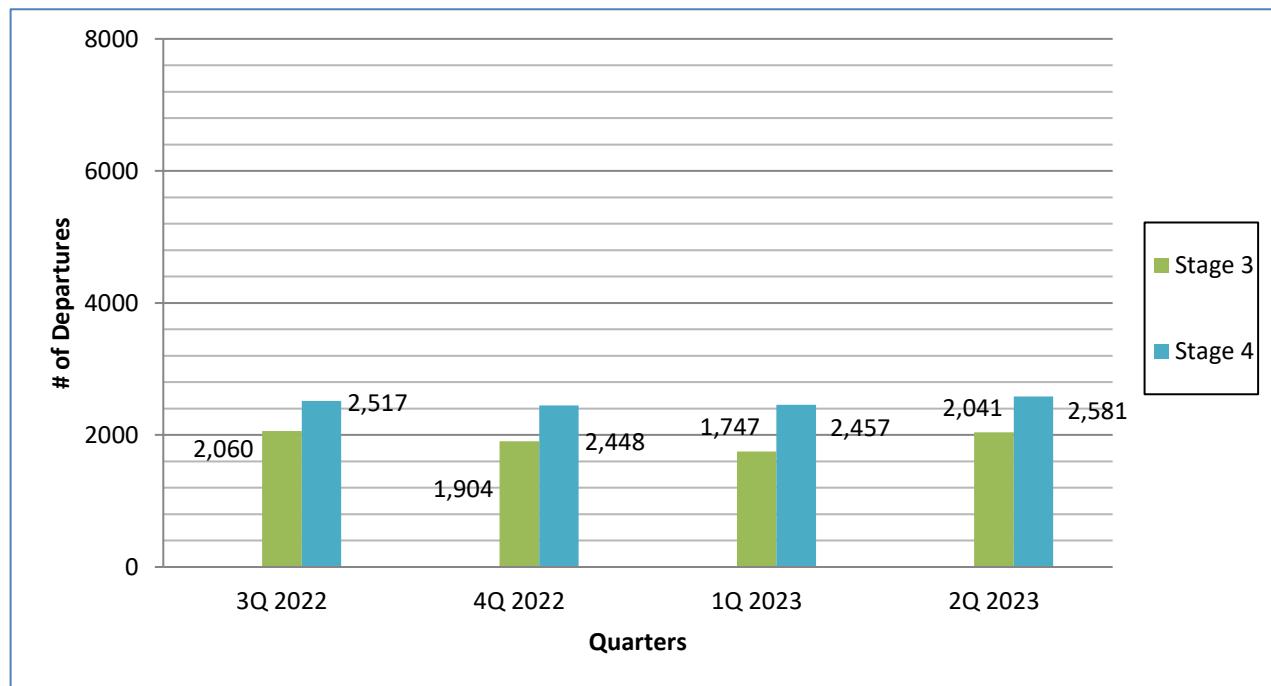

The balance of this report will focus on the scheduled commercial aircraft and cargo operations.

Part 36 Certification

During the Second Quarter of 2023 there were 4,882 total departures of commercial aircraft from Rhode Island T. F. Green International Airport, which is approximately 54 operations per day. Of the 4,882 departures, 4,622 consisted of jet aircraft with Stage 3 and Stage 4 engines, as shown in Figure 3. The overall percentage of pure Stage 3 aircraft operating at Rhode Island T. F. Green International Airport was at 42%. The overall percentage of Stage 4 aircraft operating at Rhode Island T. F. Green International Airport was at 53%.

Figure 3: Schedule Departures by Noise Classification

Source: RIAC, Airline Active Reports and Aircraft Operations Monitoring System 2022 - 2023

The scheduled airlines (air carrier and commuter) accounted for 4,500 (92%) of the 4,882 commercial departures from Rhode Island T. F. Green International Airport. The majority of airlines are operating at 100% pure Stage 3 and Stage 4 aircraft. Table 2 illustrates each scheduled air carrier's contribution to daily flights and percentage use of the quietest aircraft.

Late Night Operations (Midnight – 6:00 a.m.)

Airline operations constituted the largest number of late night operations during this quarter with 697 operations out of an overall total of 829 operations. Late night commuter operations totaled 119 operations and general aviation operations totaled 13. Of the late night operations, 248 occurred between midnight and 1:00 a.m. and 413 occurred between 5:00 a.m. and 5:59 a.m. as shown in Figure 4.

Quarterly Operations Report
2nd Quarter 2023

Figure 4: Late Night Operations for All Aircraft Types, by Time

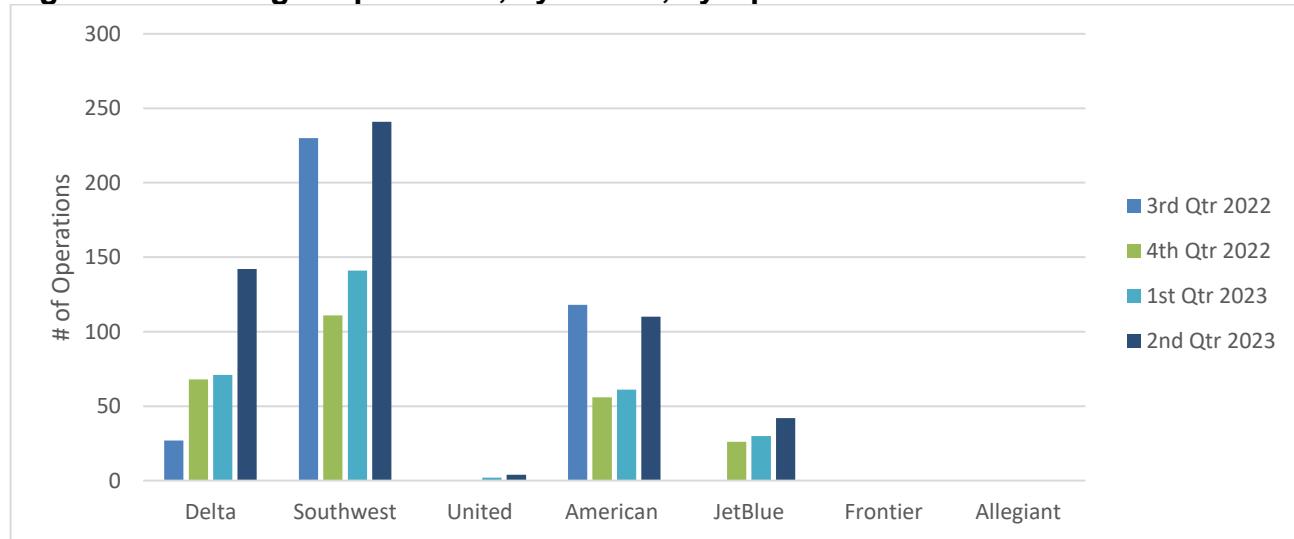

Source: RIAC Operations Logs & Operations Monitoring System 2022 - 2023

Late night operations consist of late night arrivals and early morning departures. Late night arrivals are predominantly between midnight and 1:59 a.m. Late night departures are predominately between 5:00 a.m. and 5:59 a.m.

As shown in Figure 5, Southwest Airlines had the greatest number of late night operations. It should be noted that this accounts for a small percentage of the individual airlines total operations at Rhode Island T. F. Green International Airport. A portion of these operations were arrivals of delayed flights attributed to weather or air traffic delays at the originating airports. Airline operations account for 84% of the late night operations, as depicted in Figure 6.

Figure 5: Late Night Operations, by Airline, by Operations

RIAC has implemented a voluntary nighttime curfew for operations between midnight and 6:00 a.m.

Part 150 Noise Abatement Corridor Compliance

The first Part 150 Study and Noise Exposure Maps (NEM) were approved by the FAA for Rhode Island T. F. Green International Airport in 1986. The NEM has been updated several times, most recently in 2010 as part of the Environmental Impact Statement for the Airport Improvement Program (AIP) approved in the Record of Decision (ROD) issued in November of 2011.

RIAC implemented the use of noise abatement corridors beginning in June 2001. There are a total of eight corridors, comprised of at least one departure corridor per runway and one arrival corridor for Runway 34.

For all but one runway end, there are two flight tracks that jet aircraft may follow. The Air Traffic Control Tower issues a departure heading associated with one of the Part 150 corridors based on the aircraft's destination. It should be noted that pilots will proceed on their departure heading when deemed safe to do so, depending on several variable factors (i.e., type of aircraft, winds, weather, etc.). A description of these flight corridors is presented below and a graphical depiction of the corridors is shown in Figures 7 and 8.

Quarterly Operations Report
2nd Quarter 2023

Runway 5:

Northbound Departures (D5NA): Jet aircraft will turn left as soon as practicable after passing runway end to fly a 360-degree heading until reaching 3 DME (Distance Measuring Equipment).

Southbound Departures (D5SB): Jet aircraft will turn right to a 080-degree heading until reaching 3 DME, passing over Passeonkquis Cove, Gaspee Point Beach and Narragansett Bay.

Runway 23:

Northbound Departures (D2NA): Jet aircraft will turn right as soon as practicable after passing runway end to a 280-degree heading until reaching 3 DME. This measure is intended to direct departures under 3,000' over compatible land use areas in Apponaug along I-95 and SR 117.

Southbound Departures (D2SA): Jet aircraft will turn left as soon as practicable after passing runway end to a 160-degree heading until reaching 5 DME or intercepting the 180-degree radial (whichever occurs first). This measure is intended to route traffic over Greenwich Bay and along the north edge of Goddard Memorial State Park.

Runway 16:

Southbound Departures (D1SA): Jet aircraft will turn right to a 180-degree heading until reaching 3 DME or intercepting the PVD VORTAC 180-degree radial. This measure is intended to direct departures over compatible land use areas along Brush Neck Cove and Greenwich Bay.

Runway 34:

Northbound Departures (D3NA): Jet aircraft will turn left as soon as practicable after passing runway end to a 330-degree heading until reaching 4 DME. This measure is intended to direct departures along compatible land use areas located along SR37 and I-295.

Southbound Departures (D3SA): Jet aircraft will turn right to a 360-degree heading until reaching 3 DME. This measure is intended to direct departures along compatible land use areas along I-95 and the Pawtuxet River corridors.

Runway 34:

Arrivals (A3SA): Jet aircraft will intercept the final approach course before crossing the shoreline at Rocky Point Beach on Warwick Neck (4 DME from the PVD VORTAC). This measure is intended to keep jet aircraft following the same course along the extended runway centerline from beyond the shoreline.

Quarterly Operations Report
2nd Quarter 2023

An analysis of each air carrier and their compliance with these departure corridors was conducted using the Aircraft Operations Monitoring System. As shown on Table 3, the overall compliance with noise corridors by the air carriers is 88%. Overall cargo carrier compliance in maintaining the aircraft's departure flight track within the corridors is also 92%.

Noise Complaints

RIAC has instituted several methods for citizens concerned about aircraft noise to voice their opinions. RIAC is committed to minimizing the effects of aircraft generated noise on the Warwick and Cranston Communities through the use of operational procedures and noise mitigation programs. Citizens can call the noise hotline and leave a message or submit a complaint via the web page.

Figure 9: Noise Complaints

Source: RIAC Noise Hotline & Website/Email Portal 2022 - 2023

As seen in Figure 9, during the Second Quarter 2023, RIAC received 30 complaints from 9 citizens.
